## CANADIAN WHISKY

The US may be Canada's biggest customer for Canadian whisky, absorbing 70 percent of its whisky, but many of the country's best bottles never cross the border. Taking this into account, we had our Canadian distiller create a mash of corn and highly flavorful rye grain and age the resulting distillate in small oak barrels for just over 12 years. The result is a full bodied whisky with an interplay of crispy wood, sweet vanilla, creamy caramel, and hints of sherry and raisin.

*This is a super smooth and enjoyable whisky, ideal for sipping over ice.*
